WORK EXPERIENCE

Internship at codeCraftersHub   August24 – Sept
CodeCrafters Hub
I have done one months of internship at codeCraters Hub as a frontend developer . Where i have to build different kind of frontend base projects like quiz-app, landing page , todo app and stopwatch like Projects. This was a great opportunity to building my logic building .

Internship at Prodigy   Sept24 - Oct
Remote Internship
I have done one months of internship at Prodigy as a frontend developer . Where i have to build different kind of frontend base projects like Whether App, Calculator , todo app and stopwatch like Projects. This was a great opportunity to building my logic building .

PROJECTS

E-commerce website

I have build an e-commerce website using next.js tailwind Css and typescript and for storing data i have use redux-persist and for state management I used redux-toolkit. The website have all the functionalities like add to card delete card increase no of products and categorize all products.

Panaverse Dao Web Clone

I have build Panaverse dao website clone of figma design into a fully responsive next.js website. Using next.js tailwind Css and typescript . Which is a pixel perfect clone panaverse dao figma design .

Prompt Generator App

I have built a full stack prompt generator application where i use MongoDBatlas database for storing data . I have introduce nextAuth authenticaton in this applicaton. I have perform all crud operations in this app. And I have wrote backends also in this projects . So it was a complete exposure of fulllStack Application .
